

**Expressway Standard Technical Specifications by NEXCO**

## **Outline of Bridge Specifications**

**Nippon Expressway Research Institute Company Limited**

**April, 2013**

# Table of Contents

<b>Preface</b> .....	<b>1</b>
<b>Chapter 1 Expressways and Bridges in Japan</b> .....	<b>2</b>
<b>Chapter 2 Bridge engineering</b> .....	<b>5</b>
2-1 Transitions .....	5
2-1-1 Reinforced Concrete (RC) Bridges.....	5
2-1-2 Prestressed Concrete (PC) Bridges .....	5
2-1-3 Steel Bridges .....	6
2-1-4 Developing hybrid structures.....	7
2-1-5 Substructures.....	7
2-1-6 Foundation.....	7
2-1-7 Seismic Designs .....	8
2-1-8 Attachments.....	9
2-2 Major Bridges.....	9
2-2-1 Concrete Bridges .....	9
2-2-2 Steel Bridge .....	16
2-2-3 Substructure .....	20
2-2-4 Foundation Structures.....	22
<b>Chapter 3 Asset management in bridge maintenance</b> .....	<b>25</b>
3-1 NEXCO's bridge asset management.....	25
3-1-1 Features of NEXCO's BMS .....	25
3-1-2 Setting maintenance goals.....	25
3-1-3 Health evaluation and deterioration prediction .....	26
3-2 NEXCO Bridge Management System (NEXCO BMS).....	27
3-2-1 Purpose and positioning.....	27
3-2-2 Health evaluation and deterioration prediction of bridge members .....	28
3-2-3 Selecting a repair and reinforcement scenario .....	29
3-2-4 Optimizing planning through accumulation of data .....	30
3-2-5 Data analysis of BMS.....	31
3-3 Inspections.....	32
3-3-1 Initial Inspections .....	33
3-3-2 Routine inspections.....	33
3-3-3 Periodic Inspection.....	34

3-3-4 In-depth Inspections.....	34
3-3-5 Extraordinary inspections.....	34

**Chapter 4 Technologies for inspections, survey, diagnosis .....36**

4-1 Paint View.....	36
4-2 Fatigue Tester .....	36
4-3 NEXCO total salinity quick testing method (On-site measuring technology for chloride ion density) .....	36
4-4 Supersonic drilling technology.....	39
4-5 Measuring remaining prestress using the steel bar cutting method .....	40

**Chapter 5 Optimum repair method for lowering LCC .....41**

5-1 Concrete surface coating methods.....	41
5-2 Concrete surface impregnation .....	44
5-3 Deck slab waterproofing system .....	47
5-4 Concrete deck slab repair and reinforcement methods .....	50
5-5 Removal of deteriorated concrete and repair method of cross sections .....	51
5-5-1 Removing concrete mechanically using the WJ method.....	52
5-5-2 Surface preparation to integrate old and new concrete .....	52
5-5-3 Cross section repair method .....	53
5-6 Anticorrosion technology .....	54
5-6-1 Weathering test.....	54
5-6-2 Combined cycle anticorrosion tests.....	57
5-6-3 Application of heavy duty protective coating.....	58
5-7 PC grout re-injecting method.....	59
5-8 Electrochemical desalination process .....	60
5-9 Countermeasures for steel bridge fatigue.....	61
5-10 Reinforcement of steel structures using fiber reinforced plastic (FRP) .....	61
5-11 Slab extension system .....	62
5-12 Aseismic Reinforcement.....	63
