

Expressway Standard Technical Specifications by NEXCO

Outline of Expressways Earthwork

Nippon Expressway Research Institute Company Limited

April, 2013

Table of Contents

Introduction	1
Chapter 1 Embankment	3
1-1 Compaction machinery and compaction thickness	3
1-2 Special Soils	4
1-3 Backfill	5
1-4 Design and construction of large-scale embankments and high embankments.....	6
1-5 Thick-layer compaction using large machinery	8
1-6 Quality control	8
1-7 Effective use of materials excavated on site by stabilization (Fig. 5)	12
1-8 Frost heaving countermeasures	13
1-9 Embankments using liquefied soil.....	14
1-10 Diversification of reinforcement soil walls and thinner wall surface materials	15
Chapter 2 Cut Slopes/Slope Works	17
2-1 Landslide/ Mudflow	18
2-2 Follow-up study of cut slopes	19
2-3 Reducing the size of long cut slopes	20
2-4 Ground anchors.....	20
2-5 Soil nailing	22
2-6 Slant-cut cylinder sheathing	23
2-7 Falling rocks	24
Chapter 3 Preparation of soft grounds.....	25
3-1 Settlement/Stabilization	26
3-2 Paving Sand	28
3-3 Lift nets.....	28
3-4 Vacuum consolidation method	29
3-5 Soft ground preparation in the future	31

Chapter 4 Culvert backfill retaining wall	32
4-1 Vertical earth load mitigation method.....	32
4-2 Application	32
4-3 New materials for pipe culverts.....	33
4-4 Maintenance and repair of pipe culverts	33
4-5 Revision of the earth load theory for retaining walls	34
4-6 Selection of retention wall structure and height, and range of application	34
Chapter 5 Soil environment.....	35
Chapter 6 Earthquake resistance.....	36
Chapter 7 Postscript	38
